PROFESSIONAL SUMMARY

AI Engineer and Technology Entrepreneur building **AI Brain** — a next-generation persistent artificial intelligence architecture with long-term vector memory, autonomous multi-agent systems, and continuous learning. Architecting cloud-native AI infrastructure entirely on Google Cloud Platform using Vertex AI, Gemini, Cloud Run, Cloud Storage, and BigQuery.

WORK EXPERIENCE

Founder & Chief Architect — AI Brain

Jan 2026 – Present

- ▶ Architected persistent AI memory architecture with vector embeddings and knowledge graph intelligence for lifetime context retention.
- ▶ Leading the development of 5 autonomous AI agents — Research, Coding, Strategy, Knowledge, and Workflow Automation.
- ▶ Engineered cloud-native infrastructure entirely on Google Cloud Platform (Vertex AI, Gemini 1.5, Cloud Run, Cloud Storage, BigQuery, Firestore).
- ▶ Developed interactive demo platform and memory calculator for the developer community and Google Cloud Startup program evaluators.
- ▶ Managing full product lifecycle: system architecture, implementation, cloud deployment, and community building.

EDUCATION

Bachelor of Commerce (B.Com)

Rajasthan, India

- ▶ Self-taught AI Systems Engineer specializing in Neural Architectures, Cloud Infrastructure, and Distributed Systems.

SKILLS & TECHNICAL EXPERTISE

AI & MACHINE LEARNING

Vertex AI Gemini API LLMs Vector Memory
Embeddings Knowledge Graphs

GOOGLE CLOUD & INFRA

Google Cloud (GCP) Cloud Run BigQuery
Firestore Cloud Storage Docker / CI/CD

AGENT SYSTEMS & DEVELOPMENT

Autonomous Agents Multi-Agent Systems
TypeScript Node.js Python REST APIs

LEADERSHIP & STRATEGY

Startup Building Product Strategy
System Design Team Management
GCP Startup Program
